EDUCATION

IIIT Nagpur- B.Tech — Electronics & Communication Engineering

Aug 2023 – May 2027

CGPA: 7.8/10 | Relevant: Generative AI, Data Structures & Algorithms, Database Systems, Operating Systems

SKILLS & TECHNOLOGIES

AI / ML: Supervised & Unsupervised Learning, Neural Networks, NLP, Prompt Engineering, LLM Fine-tuning, RAG Pipelines, Model Deployment

GenAI & APIs: OpenAI API, Anthropic API (Claude), LangChain, Embedding Models, Vector Databases, Webhook Automation

Backend & DBs: Node.js, Express.js, REST APIs, Socket.IO, WebRTC, MongoDB, PostgreSQL, Redis

Languages & Tools: Python, JavaScript (ES6+), C++, Java, Docker, Git, Linux, Postman

Cloud Platforms: Hands-on knowledge of AWS and Azure

PROJECTS

Sports Analytics AI Assistant — RAG-Powered Sports Intelligence Platform

Mar 2026

Python · RAG · LangChain · OpenAI/Anthropic API · Vector DB · NLP · FastAPI

- Built an end-to-end RAG pipeline allowing users to upload match stats/video transcripts; indexed via vector embeddings for semantic retrieval and AI-powered tactical analysis.
- Developed an AI Coach Chatbot using LLM + retrieval-augmented generation delivering real-time performance suggestions, opponent pattern breakdowns, and strategic insights.
- Engineered opponent pattern analysis module using NLP to extract behavioural trends across historical match data, enabling data-driven pre-match strategy generation.

Emotion Empathizer — NLP-Powered Emotion Detection & Empathetic Response System

Jan2026

Python · NLP · Transformer Models · Sentiment Analysis · OpenAI/Anthropic API

- Built NLP pipeline classifying 5 emotions (joy, sadness, anger, fear, surprise) from free-text using fine-tuned transformer models with high accuracy.
- Integrated Anthropic/OpenAI API to generate empathetic, emotionally-aware responses; designed feedback loop enabling the model to improve tone based on user sentiment shift.

YooChat — Real-Time Social Chat Platform

Oct 2025

Node.js · Socket.IO · MongoDB · WebRTC · JWT

- Engineered real-time messaging with sub-200ms delivery latency using Socket.IO; WebRTC P2P voice & video calling for hundreds of concurrent sessions.
- Architected OTP-based passwordless auth with JWT session management and RBAC for scalable user-conversation mapping.

YooStay — Hotel Booking Platform with AI Guest Support Chatbot

Aug 2025

Node.js · PostgreSQL · Redis · OpenAI API · LangChain · Docker · Stripe · Razorpay

- Built a hotel-specific AI chatbot embedded in the website; guests can ask natural-language questions (room availability, amenities, policies) and receive instant context-aware answers tailored exclusively to the hotel's data.
- Designed an atomic reservation engine handling 5,000–8,000 parallel booking requests with zero double-booking via Redis distributed locking and PostgreSQL transaction management.
- Reduced API latency ~30% using Redis caching; integrated Stripe & Razorpay with idempotent webhook-based payment confirmation; containerized full stack with Docker.

CERTIFICATIONS & ACHIEVEMENTS

Generative AI with Large Language Models — Coursera (AWS & DeepLearning.AI)

2025

3-module specialization covering LLM pre-training, fine-tuning (RLHF, PEFT, LoRA), RAG pipelines, LLM-powered applications, and responsible AI deployment at scale.

Codeforces (1230) -- [Dhairya_04 - Codeforces](#)

Machine Learning Specialization — Coursera (Andrew Ng)

Supervised/Unsupervised Learning, Reinforcement Learning, Neural Networks, model deployment.

- Campus Finalist — ML Hackathon, IIM Indore** | Applied ML: model building, evaluation & presentation
- 1st Place — EcoHackathon, IIT BHU** | Built full tech solution in 24-hour inter-college competition

POSITIONS OF RESPONSIBILITY

Senior Member, DevOps Club — IIIT Nagpur

Aug 2025 – Nov2025

- Led workshops on CI/CD, Docker, and cloud deployment for 50+ students; mentored juniors on Linux and modern DevOps practices.

Member, Coding Club — IIIT Nagpur

Aug 2024 – Nov2025

- Active in coding contests, collaborative backend projects, and DSA knowledge-sharing sessions.
